

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

As a user, I want the "+" button to increase by 1 so that I can see how many clicks I have done.

As a user, I want the "+" button to increment by 1 even if the number is a negative so that i can start adding even when i have subtracted below 0

As a user, I want the "+" button to change colour so that i know when i have clicked on the button.

As a user, I want the "+" button to highlight when i hover over it so that i know its a pressable button if not already selected

As a user, I want there to be option to increase the "+" by more than 1 so that i can add larger increments per click

2. User story(ies) in Gherkin syntax for the "-" button.

As a user, I want the "-" button to decrease by 1 so that I can see how many clicks I have done.

As a user, I want the "-" button to decrease by 1 even if the number is positive so that i can start subtracting even when i have added above 0

As a user, I want the "-" button to change colour so that i know when i have clicked on the button.

As a user, I want the "-" button to highlight when i hover over it so that i know its a pressable button if not already selected

As a user, I want there to be option to decrease the “-” by more than 1 so that i can subtract larger increments per click
